Established in 1978 AZM has emerged as a major firm of Information Technology related services, strongly committed to fortify the clients to face the challenges of rapidly changing world by providing comprehensive and innovative solutions. Corner stone of our strategy to achieve this objective is "Customer-Centered Growth".

Hence today the services of AZM ranges through the BPR, Systems designing, ERP implementation and knowledge based customized solutions. In addition to this we strive for "Customer Driven Quality" which demands constant sensitivity to changing and emerging customer plus market requirements, and the factors that drive customer satisfaction and retention.

We feel that our project management approach complimented by significant emphasis on change management, client focus and utilizing our multi-sectoral experience played most important role in successes over the three decades.
