

Financial Information & Control System

Let FICS.....

.....Complete the Picture

FICS is powerful database independent, modular-based **ERP** software that gives growing businesses the power and flexibility needed to meet the increasing demands of their expanding businesses without making the leap to the costs and complexities of many "big company" systems.

Automates all the key business activities along with quick and easy reporting, FICS scales as businesses grow and offer secure system and audit controls and reliable multi-user access, backed by training and support.

Designed specifically for growing businesses, that helps users work more productively, access the information they need for timely decisions, and effective integration with other applications.
