

The Pakistan Software Export Board (PSEB) initiated a project aimed at development of an Enterprise Resource Planning - ERP for the associations of Ready-made Garments Manufacturing units of PRGMEA (woven garments) and Hosiery Manufacturing units of PHMA (knitted garments).

We at AZM took this initiative and developed our GBMS – An Open Source Product to serve the particular industry. GBMS is designed & developed to cater the standard / general needs of all the sections/departments managing production, and to make the information available to other sections/departments & Top Management for quick access. GBMS also resolves the issues of data duplication & errors and timely delivery.

GBMS is equipped with Browser based interface; Data export facility, Strong User management, Drill down menus & much more. We are confident GBMS is the only available solution for the readymade garments manufacturing concerns & hosiery mills manufacturing industries and as we say it GBMS KNOWS YOUR NEEDS

If you are looking for something different & sophisticated ERP solution AZM invites you to catch a glimpse of the scope and flexibility of GBMS & we are sure you'll find GBMS best suited for your business.

...automation means  
do it yourself...

## FIVE GOOD REASONS, WHY GBMS ?

### 1- FOR SMES

GBMS is designed & developed to accommodate the growing needs of SMEs, especially for the local industry having a small to large scale IT infrastructure. GBMS is the only solution for SMEs not satisfied with low-end accounting systems and they don't want to implement the midrange ERP solutions.

### 2- TARGETED PRODUCT

GBMS is a targeted product designed & developed for manufacturers and work order-based business, specifically addressing the operational IT needs of garment & hosiery manufacturing concerns.

### 3- A COMPLETE SOLUTION

GBMS is a complete IT solution fulfilling all the core requirements needed to run a manufacturing or work order-based business. GBMS is an integrated and complete solution with every information being entered into the system only once.

### 4- WEALTH OF EXPERIENCE

GBMS is a reflection of more than 20 years of successful implementations in some of the biggest industries in Pakistan, and the valuable feedback from satisfied customers.

### 5- OPEN SOURCE PRODUCT

GBMS is an open source product, source code is available for every one and provided with each implementation. The GBMS being OS independent can be implemented on any or a combination of operating systems and database.
