

HMS Software Suites from AZM improves both productivity & performance for full-service hotels, resorts, conference centers, multi-properties & enterprise hospitality organizations by supplying them with robust solutions encompassing all aspects of property management systems, reservation software, hospitality software, resort software, hotel software, sales & catering software and remote reservations.

Simple.... Accurate... Fancy....

Hotel Management System, HMS, is a complete solution that takes care of small, medium, large size hotels, properties and motels.

The system is available in English and Arabic with high performance and perfect user interface.

HMS is a reliable system which is easy to use over the network with multi-users environment. It is flexible and fast. You can define your own rooms, suites, services and any other information regarding your hotel or customers. HMS provides a very smooth mechanism to follow up the customer's reservation, orders, services and billing through the whole period of residency.

This is all through simple user friendly interface with a neat design.

You can also print advanced reports with full clear and simply presented information about all the rooms, customers, services, etc.

HMS is customizable and upgrade able . You can add your own reports and functions. It is suitable for you whatever because its specially for your business!
